2023

Secured 96.2% in 12<sup>th</sup> boards (ISC) examinations

## TECHNICAL KNOWLEDGE

Languages: Java, Python, C, JavaScript, HTML, CSS

Theoretical: Data Structures and Algorithm, OOP

Developer Tools: GitHub, Visual Studio Code

## PROJECTS

- Web Based Weather Application:

The **Weather App** is a simple yet functional web application that provides real-time weather information for any location worldwide. The app uses **HTML, CSS, and JavaScript** to create a dynamic and interactive experience. Users can input the name of a city, and the app will fetch the current weather data for that location from a **weather API**.

- Tic Tac Toe Game :

A simple **Tic-Tac-Toe** game built using **HTML, CSS, and JavaScript**. This interactive web-based game allows two players to take turns marking "X" and "O" on a 3×3 grid. It includes a user-friendly interface, winning logic detection, and a reset button to start a new round.

- Amazon Frontend Clone:

An **Amazon Clone** built using **HTML and CSS**, replicating the design and layout of the Amazon homepage. This project features a responsive design, a structured product grid, a navigation bar, and a footer similar to the original website.
